

HACKATHON — IDEA & APPROACH SUBMISSION

Use this template to explain your problem, proposed solution, technical approach, and expected outcome.

Team Name	
Team Members	
Hackathon Topic / Challenge	
Project / Solution Name	
Date	

1. Problem Understanding

Describe the problem you are solving. Explain who faces the problem, why it matters, and the key pain points.

2. Proposed Solution / Idea

Explain your proposed solution in simple terms. What are you building and how does it solve the problem?

3. Key Features

List the main features or capabilities of your solution. Mention the most important features first.

4. Approach & Workflow

Describe the step-by-step flow of how your solution will work, from user input to final output.

5. Technology Stack

Mention the technologies, programming languages, frameworks, databases, APIs, cloud services, AI/ML tools, etc. that you plan to use.

6. System Architecture / Design

Add a high-level architecture diagram here if applicable. Explain the major components and how they communicate.

7. Innovation / Uniqueness

What makes your idea different, innovative, or better than existing solutions?

8. Expected Outcome / Impact

Describe what you expect the solution to achieve and the value it provides to users or stakeholders.

9. Implementation Plan

Briefly describe how you will implement the solution during the hackathon. Mention milestones, priorities, and what will be demonstrated.

10. Challenges & Risks

Mention possible technical, time, data, integration, or other challenges and how you plan to handle them.

11. Demo / Prototype Plan

What will you demonstrate at the end of the hackathon? Mention the core user journey and the features that will be functional in the demo.

12. Team Responsibilities

Member Name	Role / Responsibility	Key Contribution

Submission Requirements

- **Maximum file size:** The submitted PDF must not exceed **10 MB**.
- Keep the document clear, concise, and easy to understand.
- Include diagrams, flowcharts, architecture diagrams, or screenshots where they help explain the idea.
- The proposed approach should be realistic to implement within the hackathon timeframe.
- Clearly identify your team's contribution and the expected outcome.
- Submit the final document in **PDF format**.

Declaration: We confirm that the information provided in this document represents our team's proposed approach for the hackathon challenge.
